

Hello...

**What makes a thriving
ecosystem?**

Our Belief

Thriving ecosystems don't happen by accident...

They emerge when people, organisations and opportunities are easy to find, easy to connect and encouraged to collaborate.

The Challenge

Discovery is hard

The Challenge

Discovery is hard.

The problem isn't activity.

The problem is visibility.

People often don't find things they'd value because they don't realise they're there

The Opportunity

The network effect increases visibility

When visibility improves, connections appear

Hidden links become real opportunities

- Communities connect
- Organisations connect
- Employers meet people
- Events surface opportunities

The front door opens to

A joined up view of the ecosystem

Every organisation promotes itself.

**SussexDigital
promotes Sussex.**

We Amplify, not replace

SussexDigital exists to amplify existing organisations rather than compete with them...

Helping existing organisations reach more people, rather than asking them to change what they already do.

How does SussexDigital sustain itself?

Today

- Built and funded by me.
- Minimal operating costs.
- Community-first, not profit-first.

Near term

- Paid job listings.
- Sponsored newsletters?
- Sponsored listings?

Beyond the website

Services could include:

- Events & experiences
- Connecting people and organisations
- Supporting regional programmes
- Sharing expertise and insight
- ...and whatever the ecosystem needs next

**Revenue should
enable the ecosystem,
not compromise it.**

I don't expect to be able to give up the day job

Let's Collaborate and Strengthen Sussex together

Ways you can help

- Let us help you... we'll promote what you are offering (if you tell us about it).
- Open doors... create connections that strengthen Sussex's digital ecosystem.
- Get the word out... tell your customers about SussexDigital.
- Promote the website and link to it... more visitors = more visibility for everything.
- Tell us what you need... help shape the future.

Thank you!
